# COPYRIGHT RESERVED BCA(III) — Comp. Net. (303) Core – VII

## 2019

Time: 3 hours

Full Marks: 70

Candidates are required to give their answers in their own words as far as practicable.

The figures in the margin indicate full marks.

Answer from all the Sections as directed.

#### Section - A

### (Compulsory)

- Choose the correct answer from each of the following multiple choice questions: 2×10 = 20
  - (a) The protocol data unit (PDU) for the application layer in the Internet stack is:
    - (i) Segment
- (ii) Datagram
- (iii) Message
- (iv) Frame

DY - 9/3

(Turn over)

| (b)          | Which of the following transport layer                                  |                                    |        |                      |  |

|                       | Section – B                                                                                                                                                     |  |  |  |
|                       | Answer any <b>four</b> questions of the following: $5\times4=20$                                                                                                |  |  |  |
|                       | Define any four Network Topologies with their advantages.                                                                                                       |  |  |  |
| DY-                   | -9/3 (3) (Turn over)                                                                                                                                            |  |  |  |

- 3. Define the parallel and serial transmission modes.
- 4. Describe the types of Network.
- 5. Describe the term DNS and HTTP.
- 6. Describe the network layer protocol of IP Protocol.
- 7. Describe the types of Guided Media.
- 8. What is error recovery protocols?
- 9. What is TCP/IP Model?

#### Section - C

Answer any two questions of the following:

 $15 \times 2 = 30$ 

- 10. What is multiplexing? Explain their types.
- 11. Describe the layered architecture of open system interconnection.
- 12. Explain the cocept of error dectection and correction.
- 13. What is switching? Explain their types.
